POWERHOUSE LR-3030A POWER TO SPARE FEATURES YOU WANT

Save \$100 Sale Price \$199⁹⁵

LAFAYETTE LR-3030A AM/FM STEREO RECEIVER

30 watts per Channel, minimum RMS Both Channels Driven Into 8 Ohms
From 20-20,000 Hz; With No More Than 0.5% Total Harmonic Distortion

Phase Lock Loop FM Multiplex for stereo separation at minimum distortion. Versatility is part of the picture as you cross-dub from Tape 1 to Tape 2, and create your own program material from records or off the air. The big surprise is that Lafayette's LR-3030 has so much higher priced features at such a low price, including solid-state IC dependability; a full complement of controls with detents for positive switching, even to the center detent on Balance. Two tuning meters give you Signal Strength and Center Tuning for pinpoint reception at peak levels, and you can hook up two pairs of speakers, playing either or both sets together. Switched FM Muting does away with inter-station noise on FM. Bass, Treble and Midrange controls put you in charge of total sound. Fused protection overall prevents over-load damage to receiver and speakers. From the accessory AC outlets and quick-connect speaker terminals on the rear panel, to the front panel stereo headphone jack, everything is made for your convenience and enjoyment. Japan. 120 volts, 50/60 Hz AC. 19 1/4" W x 6 1/2" H x 14" D.

LAFAYETTE LR-1515 AM/FM STEREO RECEIVER

Save \$50 Sale Price \$149⁹⁵

- 15 Watts Per Channel Minimum RMS, Both Channels Driven into 8 Ohms from 40-20,000 Hz with no more than 0.7% Total Harmonic Distortion.

The LR-1515 features Phase Lock Loop circuitry which acts with the speed of light upon a fixed, built-in electronic reference to keep FM stereo reception at its best. All controls have the professional feel of detents for positive switching with center detent only for Balance. Provision is made for two sets of speakers, and you can use either . . . or both. Facilities for Tape Monitoring and a full range of Tone and Loudness controls plus High Frequency Filter. A convenient accessory power outlet is on the rear panel, while stereo headphone jack is on the front panel. Dual antenna input for FM at 75 ohms unbalanced, and 300 ohms balanced input for external antenna. AM antenna provision includes a built-in adjustable ferrite bar, and an external antenna can be used. Fused Receiver Output. For 105-120 volts, 50/60 Hz AC. 16½"W, 5¾"H, 11¾"D. Japan.

LAFAYETTE CRITERION 2001+

Top-rated by a leading consumer magazine, with amplifiers and receivers up to 70 watts per channel. Bass sounds are achieved by a 10" woofer strengthened by three internal tuned ducts radiating through a base vent. A phenolic ring tweeter provides wide dispersion for crisp, sharp high-frequency tones. A matched exponential horn captures life-like midrange frequencies. Bass and treble are separated with suppressed distortion at crossover points. Midrange and treble controls allow you to adjust the sound to any listening environment. The vinyl-covered cabinet is built of high-density particle board, with removable grille in a sculptured cafe brown polyester knit that is virtually distortion-free. Built-in fuses protect speakers from power overload. System Response: 30-20,000 Hz; Power Handling: 70-watts Program; Impedance: 8-ohms; Dimensions: 14½W x 25H x 13½"D. Japan. Mail wt., 42.0 lbs. each.

IN CASE OF ERRORS OR INQUIRIES ABOUT YOUR BILL

The Federal Truth in Lending Act requires prompt correction of billing mistakes.

- 1) If you want to preserve your rights under the Act, here's what to do if you think your bill is wrong or if you need more information about an item on your bill:
 - a) Do not write on the bill. On a separate sheet of paper, write the following:
 1. Your name and account number (if any).
 2. A description of the error and an explanation (to the extent you can explain) why you believe it is an error. If you only need more information, explain the items you are not sure about and, if you wish, ask for evidence of the charge, such as a copy of the charge slip. Do not send in your copy of a sales slip or other document unless you have a duplicate copy for your records.
 3. The dollar amount of the suspected error.
 4. Any other information (such as your address) which you think will help the creditor to identify you or the reason for your complaint or inquiry.
 - b) Send your billing error notice to the address on your bill which is listed after the words: "Send inquiries to:" or similar wording. Mail as soon as you can, but in any case, early enough to reach the creditor within 60 days after the bill was mailed to you.
- 2) The creditor must acknowledge all letters pointing out possible errors with 30 days of receipt unless the creditor is able to correct your bill during that 30-day period. Within 90 days after receiving your letter, the creditor must either correct the error or explain why the creditor believes the bill was correct. Once the creditor has explained the bill, the creditor has no further obligation to you even though you still believe that there is an error except as provided in Paragraph 5 below.
- 3) After the creditor has been notified, neither the creditor nor an attorney nor a collection agency may send you collection letters or take other collection action with respect to the amount in dispute; but periodic statements may be sent to you, and the disputed amount can be applied against your credit limit. You cannot be threatened with damage to your credit rating or sued for the amount in question nor can the disputed amount be reported to a credit bureau or to other creditors as delinquent until the creditor has answered your inquiry. However, you remain obligated to pay the part of your bill not in dispute.
- 4) If it is determined that the creditor has made a mistake, you will not have to pay any finance charges on any disputed amount. If it turns out that the creditor has not made an error, you may have to pay finance charges on the amount in dispute, and you will have to make up any missed minimum or required payments on the disputed amount. Unless you have agreed that your bill was correct, the creditor must send you a written notification of what you owe; and if it is determined that the creditor did make a mistake in billing the disputed amount, you must be given the time to pay which you normally are given to pay on disputed amounts before any more finance charges or late payment charges on the disputed amount can be charged to you.
- 5) If the creditor's explanation does not satisfy you, and you notify the creditor in writing within 10 days after you receive this explanation, that you still refuse to pay the disputed amount the creditor may report you to credit bureaus and other creditors and may pursue regular collection procedures. But the creditor must also report that you think you do not owe the money and the creditor must let you know to whom such reports were made. Once the matter has been settled between you and the creditor, the creditor must notify those to whom the creditor reported you as a delinquent of the subsequent resolution.
- 6) If the creditor does not follow these rules, the creditor is not allowed to collect the first fifty dollars of a disputed amount and finance charges, even if the bill turns out to be correct.
- 7) If you have a problem with property or services purchased with a credit card, you may have the right not to pay the remaining amount due on it, if you first try in good faith to return them or give the merchant a chance to correct the problem. There are two limitations on this right:
 - a) you must have bought them in your home State or, if not within your home State, within 100 miles of your current mailing address; and
 - b) the purchase price must have been more than \$50. However, these limitations do not apply if the merchant is owned or operated by the creditor or if the creditor mailed you the advertisement for the property or services.

- All-In-One 8-Digit Calculator, Digital Alarm Clock and Stopwatch.
- Four Basic Math Functions Plus Time and Date Calculations.
- Shows Hours, Minutes, Seconds, AM/PM, Day and Date.
- Records Elapsed Time.

As a calculator, it performs four basic functions up to eight digits with constant and floating decimal. It calculates time up to 99 hrs., 59 min., 59 sec.; dates from Jan. 1, 1901 to Dec. 31, 2099. As a crystal quartz timepiece, its digital display is accurate within 15 sec./month. The calendar is permanently programmed and requires no adjustments for lengths of months or leap years. Four separate alarm settings. The stopwatch measures normal, net and elapsed time to 1/10th sec. up to 9 hrs., 59 min., 59.9 sec. Powered by batteries (included) or AC through optional adapter (sold below). Pocketsize 1½ x 5½ x 3". Japan. Mail wt., 1.0 lbs.

The Bearcat® 210 Automatic Scanning Radio

Save \$50 Now Only \$249⁹⁹

- Receives All Public Service Frequencies Plus 2-Meter Amateur.
- Crystal-less Solid State Design.
- Simple Keyboard Programming.
- Automatic Search — to find new frequencies.
- Scans 20 Channels per Second.

The Bearcat® 210 scanning radio lets you select from *any* public service band and from *all* local frequencies by simply pushing a few buttons. Pick any of the 10 frequencies you want to scan and punch them in on the keyboard. The large decimal display tells you which frequencies you're monitoring. And, you can change frequencies as often as you like, quickly and easily. Automatic search lets you find activity on unknown frequencies. You can select a full or partial range of frequencies within a band and the Pushbutton Lockout lets you skip over frequencies. Bearcat's patented track tuning automatically aligns circuitry to each frequency monitored without adjustments. A 2-second Scan Delay prevents missing transmissions when calls and answers are on the same frequency. Other highlights include: manual scanning; tone by-pass; 3" front-mounted speaker; squelch control; electronically switched monopole antenna. It operates on 110-120 VAC, 50/60 Hz, or 13.8V DC, 6W. Comes complete with mobile mounting bracket and DC power cord for mobile operation. U.L. Listed. F.C.C. certified. Mail wt., 6.0 lbs. **WARRANTED BY MANUFACTURER (SEE PAGE 9)**

LAFAYETTE MONITORSCAN™ 5B-8 SCANNER

- Fully Automatic Coverage on 5 Bands — Including Police, Fire, Transportation, Civil Defense, U.S. Weather, Local Gov't, Industrial and 2-Meter Amateur Bands
- Track Tuning for Full Spread Coverage on All Bands

The Monitorscan™ 5B-8 automatically monitors up to 8 frequencies of your choice on any of 5 bands. Simply plug in the appropriate crystal for each station you want to monitor in the VHF-Lo (30-50 MHz), VHF-HI (148-174 MHz) or the 2 UHF bands (450-512 MHz), as well as the 2-meter band (146-148MHz). Unit scans each crystal-selected frequency and locks in on transmitting channel. Scanning is resumed when transmission is completed. Eight front-panel LED lamps provide visual scan of each monitored station, with lamp remaining lit when signal is locked in. Switches permit by-passing any of the channels. Auto-manual switch allows individual channel selection. Variable squelch cuts background and inter-station noise. Antenna included. External speaker, headphone jack and external antenna jack on rear panel. From 117VAC. Size 9½ x 3¾ x 7". Furnished without crystals. Order certificates below. Made in U.S.A. Lafayette Warranty (See Page 9)
